- A The Company's local exchange services have a variety of available features that let the Customer design a service tailored to meet their needs. Below are feature descriptions.

Caller ID with Number

Allows for the automatic delivery of a calling party's number to the called customer. The telephone number is displayed on customer-provided equipment. If the Customer has call waiting on the same line, they will hear the call waiting tone, but the new incoming call number will not be displayed.

Caller ID with Name and Number

Allows for the automatic delivery of a calling party's name and number to the called party. The name and number are displayed on customer-provided equipment. If the Customer has call waiting on the same line, they will hear the call-waiting tone, but the new incoming name and number will not be displayed.

Caller ID Blocking Per Line

Provides default blocking of delivery of the calling customer's telephone number. Blocking can be deactivated by the customer by dialing an access code before each call. When the customer hangs up, the default blocking is reinstated.

Caller ID Blocking Per Call

2.2 Feature Descriptions (cont'd)

Call Forward

This optional feature allows all calls directed to a telephone number to be routed to a user defined telephone number. The user can activate/deactivate Call Forward and define a telephone number where all calls will be forwarded. Calls cannot be forwarded to an International Direct Distance Dialing (IDDD) number.

Call Forward Busy Line

This optional feature forwards calls to a busy station to a predetermined number. Calls cannot be forwarded to an International Direct Distance Dialing (IDDD) number. The user is charged any applicable usage charges for the forwarded call.

Call Forward Don't Answer

Allows users to re-route a call to a predetermined station in the event that the call is not answered within a customer-specified number of rings. Users are charged for any applicable usage charges on the forwarded call.

Call Pick Up

This optional feature allows a call to be answered from a different line by dialing a code. All lines in the group must be equipped with this feature. The Customer can have an unlimited number of lines in a Call Pick Up group.

Call Transfer

This optional feature allows the user to transfer any established call to another telephone number (inside or outside of the system) without the assistance of an attendant.

Call Waiting

This optional feature provides a tone to notify a Customer on an existing call that a second call is waiting.

Consultation Hold

This temporary hold feature is inherent in Call Transfer and Three Way Calling. It is activated by depressing the switch hook.

Direct Connect Hotline

This optional feature allows a Customer to automatically dial a designated number whenever the originating telephone goes off hook. This feature is assigned to a phone which is used only for this purpose.

Hunting

This standard feature routes a call to an idle line in a prearranged group when the called telephone number is busy. Typically this feature is used with the customer's main telephone number and several subtending lines so that the customer can receive calls on several lines, although all calls are placed to the same number. Hunting will not work with Call Forward Busy and Don't Answer.

Speed Dial

This optional feature allows a Customer to designate up to six numbers to be called by dialing a code.

Speed Dial, Expanded

This optional feature allows Customer to designate up to thirty numbers to be called by dialing a code.
